

Example 7

In the figure $XO = 8$, $ZO = 6$, and the vertex Y of rectangle $XYZO$ lies on circle O . Find the area of the shaded region. Express your answer in terms of π .

Solution: $25\pi - 48$ (units²)

Connect YO . We see that triangle OXY is a 6-8-10 right

triangle. So the radius of the circle is 10. The area of the circle is $\pi \times 10^2 = 100\pi$. The area of the quarter circle is 25π . The shaded area is $25\pi - 6 \times 8 = 25\pi - 48$
